VOLUME 163 CONTENTS

NUMBER 1, JANUARY 2002

1–16 The Stigma Surface and Pollen-Stigma Interactions in *Senecio squalidus* L. (Asteraceae) following Cross (Compatible) and Self (Incompatible) Pollinations
Simon J. Hiscock, Karin Hoedemaekers, William E. Friedman, and Hugh G. Dickinson

17–41 *CRABS CLAW* and *SPATULA* Genes Regulate Growth and Pattern Formation during Gynoecium Development in *Arabidopsis thaliana*
John Alvarez and David R. Smyth

43–50 Cloning and Analysis of a MADS-box Gene Expressed in *Poa annua* MD-2 Apices during Floral Meristem Formation
Aiguo Li and Jeffrey D. Griffin

51–65 Intergeneric Relationships within the Caricaceae-Moringaceae Clade (Brassicales) and Potential Morphological Synapomorphies of the Clade and Its Families
Mark E. Olson

67–74 The Uncertain Systematic Position of *Symplocos* (Symplocaceae): Evidence from a Floral Ontogenetic Study
Pieter Caris, Louis P. Ronse Decraene, Erik Smets, and Denis Clinckemaillie

75–87 Floral Ontogeny of *Cercis* (Leguminosae: Caesalpinioideae: Cercideae): Does It Show Convergence with Papilionoids?
Shirley C. Tucker

89–98 The Structure of Enlarged Storage Roots in Cacti
Matthew E. Stone-Palmquist and James D. Mauseth

99–105 Nutrient Resorption Efficiency and Proficiency in Fronds and Trophopods of a Winter-Deciduous Fern, *Dennstaedtia punctilobula*
Keith T. Killingbeck, Susan L. Hammen-Winn, Patricia G. Vecchio, and Marie E. Goguen

107–112 Seed Vigor, Aging, and Osmopriming Affect Anion and Sugar Leakage during Imbibition of Maize (*Zea mays* L.) Caryopses
Xirong Ouyang, Tijmen van Voorthuysen, Peter E. Toorop, and Henk W. M. Hilhorst

113–122 Reproductive Biology and Delayed Selfing in *Viola pubescens* (Violaceae), an Understory Herb with Chasmogamous and Cleistogamous Flowers
Theresa M. Culley

123–132 Effect of Geographical Variation in Pollinator Fauna on the Mating System of *Decodon verticillatus* (Lythraceae)
Christopher G. Eckert

133–139 The Contribution of Display Size and Dichogamy to Potential Geitonogamy in *Campanula americana*
Laura F. Galloway, Tammy Cirigliano, and Kristina Gremski

141–150 Population Differentiation in the Range Expansion of a Native Maritime Plant, *Solidago sempervirens* L.
Julia Brauer and Monica A. Geber

151–158 Genetic Diversity and Outcrossing Rate between Undisturbed and Selectively Logged Forests of *Shorea curtisii* (Dipterocarpaceae) Using Microsatellite DNA Analysis
Kyoko Obayashi, Yoshihiko Tsumura, Tokuko Ihara-Ujino, Kaoru Niiyama, Hiroyuki Tanouchi, Yoshihisa Suyama, Izumi Washitani, Chai-Ting Lee, Soon Leon Lee, and Norwati Muhammad

159–166 Low Allozyme Variability in the Critically Endangered *Borderea chouardii* and in Its Congener *Borderea pyrenaica* (Dioscoreaceae), Two Paleoendemic Relicts from the Central Pyrenees
J. G. Segarra-Moragues and P. Catalán

167–174 Molecular Cytogenetic Characterization of E^b-Genome Chromosomes in *Thinopyrum bessarabicum* Disomic Addition Lines of Bread Wheat
Ji-Yi Zhang, Xiao-Mei Li, Richard R.-C. Wang, A. Cortes, V. Rosas, and A. Mujeeb-Kazi

175–183 *Lepingia*: A New Genus of Probable Cycadalean Affinity with Taeniopterid Lamina from the Permian of South China
Lu-Jun Liu and Zhao-Qi Yao

185–196 Permineralized Pine Cones from the Cretaceous of Vancouver Island, British Columbia
Selena Y. Smith and Ruth A. Stockey

NUMBER 2, MARCH 2002

197–214 Seed Plant Relationships and the Systematic Position of Gnetales Based on Nuclear and Chloroplast DNA: Conflicting Data, Rooting Problems, and the Monophyly of Conifers
Catarina Rydin, Mari Källersjö, and Else Marie Friis

215–225 Phylogenetics of Lythraceae *sensu lato*: A Preliminary Analysis Based on Chloroplast *rbc*L Gene, *psaA-ycf3* Spacer, and Nuclear rDNA Internal Transcribed Spacer (ITS) Sequences
Ye-lin Huang and Su-hua Shi

227–233 Cypsela Development in *Acourtia* (Mutisieae, Nassauviinae, Asteraceae) and Its Taxonomic Implications
Leticia Cabrera R.

235–260 Evolution of Microsporogenesis in Angiosperms
Carol A. Furness, Paula J. Rudall, and F. Bruce Sampson

261–276 Homologies of Inferior Ovaries and Septal Nectaries in Monocotyledons
Paula Rudall

277–293 Ovary Position Diversity in Saxifragaceae: Clarifying the Homology of Epigyny
Douglas E. Soltis and Larry Hufford

295–300 Shade Promotes Thorn Development in a Tropical Liana, *Artabotrys hexapetalus* (Annonaceae)
Jack B. Fisher, Usher Posluszny, and David W. Lee

301–307 *In Vitro* Phenotypic Variation in Larch Cotyledon Number
Patrick von Aderkas

309–315 Cuticular Waxes on *Arabidopsis thaliana* Close Relatives *Thellungiella halophila* and *Thellungiella parvula*
Rebecca S. Teusink, Musrur Rahman, Ray A. Bressan, and Matthew A. Jenks

317–328 Systemic Effects on Oxidative Enzymes in *Phaseolus vulgaris* Leaves That Have Been Wounded by the Grasshopper *Melanoplus differentialis* (Thomas) or Have Had a Foliar Application of Jasmonic Acid
Antonio Alba-Meraz and Hyung T. Choe

329–334 Fluctuating Asymmetry in *Scabiosa canescens* and *Scabiosa columbaria*: Association with Genetic Variation and Population Size
Patrik Waldmann

335–340 The Effects of Pollen Competition on Progeny Vigor in *Fragaria virginiana* (Rosaceae) Depend on Progeny Growth Environment
Sara E. Kalla and Tia-Lynn Ashman

NUMBER 3, MAY 2002

341–351 Heteroblastic Root Development in *Ceratopteris richardii* (Parkeriaceae)
Gui-chuan Hou and Jeffrey P. Hill

353–367 Initiation of the Vascular System in the Shoot of *Zea mays* L. (Poaceae). II. The Procambial Leaf Traces
Thompson Demetrio Pizzolato and Marshall D. Sundberg

369–378 Tracheoid Variation among Bignoniaceae Seed Wings, with Emphasis on *Campsis radicans*
Nels R. Lersten, Laurie Krueger, and John D. Curtis

379–385 Studies into Abstract Properties of Individuals. VII. Emergence in *Hesperostipa comata* and Three Species of *Achnatherum* (Poaceae)
Jack Maze, Kathleen A. Robson, and Satindranath Banerjee

387–398 Phenotypic Differentiation between Three Ancient Hybrid Taxa and Their Parental Species
David M. Rosenthal, Andrea E. Schwarzbach, Lisa A. Donovan, Olivier Raymond, and Loren H. Rieseberg

399–408 Touchy and Bushy: Phenotypic Plasticity and Integration in Response to Wind Stimulation in *Arabidopsis thaliana*
Massimo Pigliucci

409–417 Protogyny, Pollination, and Sex Expression of Andromonoecious *Pseudocymopterus montanus* (Apiaceae, Apioideae)
Mark A. Schlessman and Laura M. Graceffa

419–425 Effect of Fine-Scale Spatial Variation of Soil Nitrogen on the Performance of the Sexes of *Poa ligularis* in Patchy Ecosystems of Northern Patagonia
Monica B. Bertiller, Claudia L. Sain, and Analia L. Carrera

427–439 Genetic Diversity among Natural and Cultivated Field Populations and Seed Lots of American Ginseng (*Panax quinquefolius* L.) in Canada
Cayetana Schluter and Zamir K. Punja

441–450 Phylogeny of Andropogoneae Inferred from Phytochrome B, GBSSI, and *ndhF*
Sarah Matheus, Russell E. Spangler, Roberta J. Mason-Gamer, and Elizabeth A. Kellogg

451–474 Morphology and Wall Ultrastructure in Devonian Spores with Bifurcate-Tipped Processes
Charles H. Wellman

475–483 A New Fossil Plant from the Earliest Carboniferous of China
Wang Yi and Xu Honghe

NUMBER 4, JULY 2002

485–505 Structure and Function of Spores in the Aquatic Heterosporous Fern Family Marsileaceae
Harald Schneider and Kathleen M. Pryer

507–517 Cladode Junction Regions and Their Biomechanics for Arborescent Platyopuntias
Edward G. Bobich and Park S. Nobel

519–529 Involvement of Indole-3-Acetic Acid in Fascicular and Interfascicular Cambial Growth and Interfascicular Extraxylary Fiber Differentiation in *Arabidopsis thaliana* Inflorescence Stems
C. H. Anthony Little, Joanne E. MacDonald, and Olof Olsson

531–541 Evolution of the Inbred Flower Form in the Currant Tomato, *Lycopersicon pimpinellifolium*
Michael S. Georgiady and Elizabeth M. Lord

543–547 The Plasma Membrane–Associated NADH Oxidase of Spinach Leaves Responds to Blue Light
D. James Morré, Claude Penel, Hubert Greppin, and Dorothy M. Morré

549–557 Altered Rainfall Patterns, Gas Exchange, and Growth in Grasses and Forbs
Philip A. Fay, Jonathan D. Carlisle, Brett T. Danner, Michelle S. Lett, James K. McCarron, Catherine Stewart, Alan K. Knapp, John M. Blair, and Scott L. Collins

559–566 Arbuscular Mycorrhizal Fungi Enhance Seedling Growth in Two Endangered Plant Species from South Florida
Jack B. Fisher and K. Jayachandran

567–573 Autogamy and Floral Longevity in *Mimulus guttatus*
H. S. Arathi, Aaron Rasch, Chris Cox, and John K. Kelly

575–579 A Manipulative Experiment to Estimate Biparental Inbreeding in Monkeyflowers
John K. Kelly and John H. Willis

581–590 Factors Affecting Low Seed : Ovule Ratios in a Spring Woodland Herb, *Trillium grandiflorum* (Melanthiaceae)
Steven R. Griffin and Spencer C. H. Barrett

591–597 Serial Adjustments in Allocation to Reproduction: Effects of Photosynthetic Genotype
A. Michele Arntz, Elaine M. Vozar, and Lynda F. Delph

599–612 The Relative Effects of Resources and Genetics on Reproductive Success in the Rare Kachina Daisy, *Erigeron kachinensis* (Asteraceae)
Loreen Allphin, Delbert Wiens, and Kimball T. Harper

613–618 The Spatial Scale of Genotype by Environment Interaction (GEI) for Fitness in the Loose-Flowered Gilia, *Ipomopsis laxiflora* (Polemoniaceae)
Thomas Juenger and Joy Bergelson

619–630 Population Structure and Genetic Diversity of Two Endangered Endemic Species of the Canarian Laurel Forest: *Dorycnium spectabile* (Fabaceae) and *Isoplexis chalcantha* (Scrophulariaceae)
N. Bouza, J. Caujapé-Castells, M. A. González-Pérez, F. Batista, and P. A. Sosa

631–640 Demography of the Endangered Fragrant Prickly Apple Cactus, *Harrisia fragrans*
John G. Rae and Thomas A. Ebert

641–650 Phylogeny and Biogeography of *Carpinus* and Subfamily Coryloideae (Betulaceae)
Ki-Oug Yoo and Jun Wen

651–673 The Systematic and Biogeographical Relationships of *Ceratopetalum* (Cunoniaceae) in Australia and New Guinea
Andrew C. Rozefelds and Richard W. Barnes

675–686 A New Fossil Flower and Associated Coprolites: Evidence for Angiosperm-Insect Interactions in the Santonian (Late Cretaceous) of Georgia, U.S.A.
Richard Lupia, Patrick S. Herendeen, and Jennifer A. Keller

687–697 A New Species of *Pinus* Subgenus *Pinus* Subsection *Contortae* from Pliocene Sediments of Ch'ijee's Bluff, Yukon Territory, Canada
Athena D. McKown, Ruth A. Stockey, and Charles E. Schweger

NUMBER 5, SEPTEMBER 2002

699–713 The Architecture of *Pseudosporochnus nodosus* Leclercq et Banks: A Middle Devonian Cladoxylopsid from Belgium
Christopher M. Berry and Muriel Fairon-Demaret

715–723 *Regnellites nagashimae* gen. et sp. nov., the Oldest Macrofossil of Marsileaceae, from the Upper Jurassic to Lower Cretaceous of Western Japan
Toshihiro Yamada and Masahiro Kato

725–736 Leaves and Fruits of *Celtis aspera* (Newberry) comb. nov. (Celtidaceae) from the Paleocene of North America and Eastern Asia
Steven R. Manchester, Mikhail A. Akhmetiev, and Tatiana M. Kodrul

737–747 Phylogenetic Relationships of *Diploxylon* Pines (Subgenus *Pinus*) Based on Plastid Sequence Data
Gretel Geada López, Koichi Kamiya, and Ko Harada

749–754 Growth Performance and Lignification in Tobacco with Suppressed Apoplastic Anionic Peroxidase Activity under Ambient and Elevated CO_2 Concentrations
Melanie Schlimme, Lothar Blaschke, L. Mark Lagrimini, and Andrea Polle

755–763 Vessels of *Illicium* (Illiciaceae): Range of Pit Membrane Remnant Presence in Perforations and Other Vessel Details
Sherwin Carlquist and Edward L. Schneider

765–773 Histopathology of Callus and Germinating Seeds of *Arceuthobium tsugense* subsp. *tsugense* Infected by *Cylindrocarpon cylindroides* and *Colletotrichum gloeosporioides*
Shannon J. Deeks, Simon F. Shamoun, and Zamir K. Punja

775–782 Comparative Rates of Pollination and Fruit Set in Widely Separated Populations of a Rare Orchid (*Cypripedium fasciculatum*)
Sara R. Lipow, Peter Bernhardt, and Nan Vance

783–794 Variation in Pollen Tube Inhibition Sites Within and Among Three Heterostylous Species of Rubiaceae
Amy E. Faivre

795–802 Effects of Pollen Load Composition and Deposition Pattern on Pollen Performance in *Clarkia unguiculata* (Onagraceae)
M. Barbara Németh and Nancy L. Smith-Huerta

803–808 Effect of Nectar Robbery on Phase Duration, Nectar Volume, and Pollination in a Protandrous Plant
Ethan J. Temeles and Irvin L. Pan

809–813 Selective Fruit Maturation and Seedling Performance in *Acacia caven* (Fabaceae)
Carolina Torres, María C. Eynard, Marcelo A. Aizen, and Leonardo Galetto

815–823 Within-Alga Integration and Compensation: Effects of Simulated Herbivory on Growth and Reproduction of the Brown Alga, *Fucus vesiculosus*
Tuija Honkanen and Veijo Jormalainen

825–830 Environmental Sex Determination in the Genus *Equisetum*: Sugars Induce Male Sex Expression in Cultured Gametophytes
Jean-Michel Guillon and Christian Raquin

831–836 An Assessment of Genetic Diversity and Documentation of Hybridization of *Casuarina* Grown in Taiwan Using RAPD Markers
K. Y. Ho, J. C. Yang, and J. Y. Hsiao

837–845 An Investigation of the Cryptobiotic Community from Sandstone Cliffs in Southeast Ohio
Dale A. Casamatta, Robert G. Verb, John R. Beaver, and Morgan L. Vis

NUMBER 6, NOVEMBER 2002

iii–iv List of Reviewers

847–876 Development of Inflorescences and Flowers in Buxaceae and the Problem of Perianth Interpretation
Maria von Balthazar and Peter K. Endress

877–889 Procambial Initiation for the Vascular System in the Shoot of *Raddia brasiliensis* (Poaceae, Bambusoideae)
Thompson Demetrio Pizzolato

891–905 Origin, Structure, and Interpretation of the Thallus in *Hydrobryopsis sessilis* (Podostemaceae)
A. Sehgal, M. Sethi, and H. Y. Mohan Ram

907–912 Population Differentiation and Natural Selection for Water-Use Efficiency in *Impatiens capensis* (Balsaminaceae)
M. Shane Heschel, Kathleen Donohue, Neil Hausmann, and Johanna Schmitt

913–924 Photosynthetic Induction Dynamics to Sunflecks of Four Deciduous Forest Understory Herbs with Different Phenologies
James C. Hull

925–936 Physiological and Growth Responses of Riparian Sedge Transplants to Groundwater Depth
James E. Steed, Laura E. DeWald, and Thomas E. Kolb

937–948 Mesophyll Architecture and Cell Exposure to Intercellular Air Space in Alpine, Desert, and Forest Species
Michèle R. Slaton and William K. Smith

949–958 The Formation and Possible Ecological Function of Stem Strips in *Thuja occidentalis*
Uta Matthes, Peter E. Kelly, Caireen E. Ryan, and Douglas W. Larson

959–967 Developmental Instability and Gas Exchange Responses of a Heathland Shrub to Experimental Drought and Warming
Laura Llorens, Josep Peñuelas, and Bridget Emmett

969–978 Developmental Instability and Fitness in *Periploca laevigata* Experiencing Grazing Disturbance
C. L. Alados, M. L. Giner, L. Dehesa, J. Escós, F. G. Barroso, J. M. Emlen, and D. C. Freeman

979–990 Genetic Diversity and Competitive Abilities of *Dalea purpurea* (Fabaceae) from Remnant and Restored Grasslands
Danny J. Gustafson, David J. Gibson, and Daniel L. Nickrent

991–1000 Effects of *Rhododendron maximum* Thickets on Tree Seed Dispersal, Seedling Morphology, and Survivorship
Thomas T. Lei, Shawn W. Semones, John F. Walker, Barton D. Clinton, and Erik T. Nilsen

1001–1010 Growth and Reproduction of the Invasive *Ligustrum sinense* and Native *Forestiera ligustrina* (Oleaceae): Implications for the Invasion and Persistence of a Nonnative Shrub
Lorna L. Morris, Jeffrey L. Walck, and Siti N. Hidayati

1011–1016 Sex Ratio Variation of *Bischofia javanica* Bl. (Euphorbiaceae) between Native Habitat, Okinawa (Ryukyu Islands), and Invaded Habitat, Ogasawara (Bonin Islands)
Tetsuto Abe, Naoko Yamashita, Nobuyuki Tanaka, and Hiromichi Kushima

1017–1023 Seed Predation in *Philodendron solimoesense* (Araceae) by Chalcid Wasps (Hymenoptera)
Marc Gibernau, Jérôme Albre, Alain Dejean, and Denis Barabé

1025–1034 Genetic Diversity and Mating System Comparisons between Ray and Disc Achene Seed Pools of the Heterocarpic Species *Heterotheca subaxillaris* (Asteraceae)
J. Phil Gibson and Amelia D. Tomlinson

1035–1043 High Outbreeding as a Consequence of Selfed Ovule Mortality and Single Vector Bat Pollination in the Amazonian Tree *Pseudobombax munguba* (Bombacaceae)
Rogério Gribel and Peter E. Gibbs

1045–1054 Phylogeny of Clusiaceae Based on *rbc*L sequences
Mats H. G. Gustafsson, Volker Bittrich, and Peter F. Stevens

1055–1066 Phylogeny of the *Bifrenaria* (Orchidaceae) Complex Based on Morphology and Sequence Data from Nuclear rDNA Internal Transcribed Spacers (ITS) and Chloroplast *trnL-trnF* Region
Samantha Koehler, Norris H. Williams, W. Mark Whitten, and Maria do Carmo E. do Amaral

1067–1071 Pollen, Pollenkitt, and Orbicules in *Craigia bronnii* Flower Buds (Tilioideae, Malvaceae) from the Miocene of Hambach, Germany
R. Zetter, M. Weber, M. Hesse, and M. Pingen

1075–1080 Volume 163 Contents

1081–1082 Volume 163 Author Index

1083–1087 Volume 163 Subject Index
